

TECHNICAL INFORMATION SHEET

PRODUCT NAME:

PRAIRIE CLEAR

PRODUCT DESCRIPTION:

PRAIRIE CLEAR is a yellow concentrated Phosphoric Acid based product, developed to de-scale calcium and scale from lines and equipment. It will effectively remove all buildup from the surface.

PRODUCT APPLICATIONS:

PRAIRIE CLEAR must be diluted with water before use. It may be applied manually by adding a concentration of 1 part PRAIRIE CLEAR to 10 parts water and allow this solution to circulate through the equipment for twenty minutes. Flush with fresh potable water to remove all acidic solution. This dilution may be adjusted to meet different cleaning requirements.

- PROCESSING PLANTS
